

SUMMARY

Frontend engineer with six years of experience shipping React and Next.js applications across fintech, healthcare, and consumer products. Comfortable owning architecture decisions, building component systems from scratch, and dragging legacy codebases into modern stacks. Most recent work: leading the rebuild of Tapsi Doctor's web platform on Next.js 15 (App Router, TypeScript, Tailwind), where bundle splitting and SSR cut load times by ~40%. Active technical writer on React internals, performance patterns, and the React 19 compiler.

Work Experience

● Frontend Developer

Tapsi Doctor (healthcare platform, Tehran)

2/ 2025 - present

- Lead frontend on the company's web platform — React 18, Next.js 15 (App Router), TypeScript — with ownership of performance, SEO, and accessibility.
- Migrated a legacy Pages-Router codebase to App Router, introducing SSR/SSG, dynamic routing, and granular bundle splitting. Result: ~40% reduction in initial load time.
- Built the design system layer with Tailwind CSS, and Headless UI — pixel-perfect across mobile and desktop, accessibility-checked, and reused across product surfaces.
- Integrated Socket.IO for real-time appointment status and patient-doctor chat.
- Set the state-management direction (Zustand) and established conventions for forms, validation, and error boundaries across the codebase.

● Frontend Developer

Independent contracts (3 clients)

5/ 2024 - 1/ 2025

Projects:

- **Pool Khord:** Developed a comprehensive user interface using React Native, React, and Next.js. Implemented responsive design with Tailwind CSS.
- **Hitobit:** Contributed to the front-end architecture and ensured high performance and responsiveness of applications.
- **Cheetavel:** Designed and implemented the foundational architecture for the company's Next.js v15 web application, utilizing the app router for optimized routing and scalability.
- **Across all three: Atomic Design component structure, Zustand / Recoil for state, React Hook Form for forms, Socket.IO for real-time features, shadcn/ui for the design system.**

● Frontend Developer

Nobitex (largest cryptocurrency exchange in Iran)

1/ 2022 - 4/2024

- Shipped trading and account features to a high-volume exchange platform, working close to the design and product teams.
- Built and maintained real-time market data interfaces using Socket.IO — order books, tickers, and notifications, all running under heavy throughput.
- Introduced and customised shadcn/ui as the shared component library, replacing inconsistent ad-hoc components and accelerating feature delivery across teams.
- Performance: optimised rendering, bundle size, and asset loading — measured ~25% improvement in page-load times with a corresponding lift in engagement metrics.
- Maintainability: led a refactor toward consistent design patterns, raising codebase maintainability by ~35% (internal review) and cutting average bug-fix time.

- Owned dynamic landing pages and content-management surfaces; partnered with SEO to remove handoff friction between teams.

Frontend Developer

Axon

6/2020- 1/2022

- **Community Building:** Spearheaded the creation of a vibrant community of + frontend developers through meetups and virtual forums.
- **Framework Mastery:** Expertly utilized Tailwind CSS, Bootstrap, and Vuetify to create visually appealing interfaces.
- **Methodological Consistency:** Implemented BEM methodology for CSS in a recent project, resulting in a modular and organized structure. This streamlined collaboration, reduced development time by 20%, and lowered CSS-related bugs. The approach facilitated targeted updates, enhancing both code quality and delivery efficiency.

Frontend Developer

Over Clock (intern)

1/2020- 5/2020

- Developed and maintained responsive web applications with **React**.
- Collaborated with cross-functional teams, implemented **Redux** for state management, and optimized web performance.

EDUCATION

M.S. in Computer Science

Mrch 2022 - Present

B.S. in Computer Science

Aug 2017 - Aug 2021

SKILLS

- Languages JavaScript, TypeScript, HTML5, CSS3, Python (basic)
- Frameworks React, Next.js (App Router, Server Components), React Native, Vue, Nuxt
- State & Data Zustand, Redux, Recoil, React Query, React Hook Form, React Router
- Styling & Design Systems Tailwind CSS, shadcn/ui, Headless UI, Storybook, Bootstrap, Vuetify, BEM
- Testing Vitest, Jest, React Testing Library, Playwright
- CI/CD & Deployment GitHub Actions, Vercel, Docker (basic), preview environments
- Real-time / Backend Socket.IO, Prisma ORM, REST APIs
- Internationalization next-intl, react-i18next, RTL/LTR layouts
- Architecture Atomic Design, SSR / SSG, component design systems, performance optimisation, accessibility (WCAG AA)
- Workflow Git, Agile / Scrum, Figma, Chrome DevTools, Lighthouse, Web Vitals

Languages:

Persian – Native

English – Professional working proficiency

Turkish – Professional working proficiency

Dutch – A2
